

实验提交手册

1. 获取源代码 `svn checkout https://svn.riouxsvn.com/epos/`

```
% svn checkout https://svn.riouxsvn.com/epos/
A      epos/.gdbinit
A      epos/.svnignore
A      epos/Makefile
A      epos/Makefile.inc
A      epos/hd.img.bz2.txt
A      epos/include
A      epos/include/ctype.h
A      epos/include/inttypes.h
A      epos/include/ioctl.h
A      epos/include/limits.h
A      epos/include/stdarg.h
A      epos/include/stddef.h
A      epos/include/stdint.h
```

2. 根据实验内容修改源代码
3. 检查 `/epos/Makefile` 是否是最新版如 <https://svn.riouxsvn.com/epos/Makefile>
4. 如果不是最新版，可 `svn up` 更新 `Makefile`

```
epos % svn up
正在升级 '.':
版本 104.
```

5. 提交代码：`make submit`，并输入学号

```
% make submit
x86_64-elf-gcc -DVERBOSE=0 -nostdinc -I../include -M ide.c floppy.c pci.c vm86.c
kbd.c timer.c machdep.c task.c mktime.c sem.c page.c startup.c frame.c kmalloc.
c dosfs.c pe.c elf.c printk.c bitmap.c ../lib/softfloat.c ../lib/string.c ../lib
/memcpy.c ../lib/memset.c ../lib/snprintf.c ../lib/tlsf/tlsf.c >make.dep
rm -f kernel.ld entry.o ide.o floppy.o pci.o vm86.o kbd.o timer.o machdep.o task
.o mktime.o sem.o page.o startup.o frame.o kmalloc.o dosfs.o pe.o elf.o printk.o
bitmap.o ../lib/softfloat.o ../lib/string.o ../lib/memcpy.o ../lib/memset.o ../
lib/snprintf.o ../lib/tlsf/tlsf.o eposkrnl.bin eposkrnl.out eposkrnl.map make.de
p .* *.*~ .* .DS_Store *.stackdump
x86_64-elf-gcc -nostdinc -I../include -Iinclude -M vm86call.c graphics.c main.c
lib/sysconf.c lib/math.c lib/stdio.c lib/stdlib.c lib/qsrt.c ../lib/softfloat.c
../lib/string.c ../lib/memcpy.c ../lib/memset.c ../lib/snprintf.c lib/malloc.c
../lib/tlsf/tlsf.c lib/syscall-wrapper.S >make.dep
rm -f lib/crt0.o lib/setjmp.o lib/syscall-wrapper.o vm86call.o graphics.o main.o

o ../lib/string.o ../lib/memcpy.o ../lib/memset.o ../lib/snprintf.o lib/malloc.o
../lib/tlsf/tlsf.o a.out a.map make.dep .* *.*~ .* .DS_Store *.stackdump
rm -f hd.img hd.vmdk tags .* *.*~ .* .DS_Store *.stackdump
>>> Files to be submitted: userapp/main.c
>>> Total size of bytes 1277
>>> Enter student ID: █
```

6. 自动弹出浏览器，学号自动填入

OS 验证
学号:
密码:

7. 填入 32 位密钥，点击提交，提示自动上传

验证成功！自动上传...

8. 命令行提示提交成功

```
>>> Files to be submitted: userapp/main.c
>>> Total size of bytes 1277
>>> Enter student ID: 
>>> Please verify with explorer...
>>> Waiting for upload...
>>> Pass the verification, Uploading...
<<< Upload Success!!!
>>> Completed Submission
```

9. 可重复步骤 5-8 操作确认提交成功，显示文件已存在

20 already exists for the experiment: 4
